WEB DESIGN

Websites written, designed and built by in3Days Africa and live in three working days, not six weeks. Every build includes written copy for every page, a mobile-first design, contact and WhatsApp routing, search-ready markup and sixty days of support after launch. Builds run from a ten-page launch site to corporate sites, shopping catalogues and custom systems with accounts, bookings and member areas.

DIGITAL MARKETING

Monthly marketing across Facebook, LinkedIn, WhatsApp Business, X, TikTok, Instagram, YouTube and Google Business Profile: thirty posts a month with captions and design, branding kits, press releases, paid ad sets and WhatsApp catalogue cards, with Digital Navigator seats so the client's own people learn the trade alongside. The strategy is ready in three days.

HOW A BUILD RUNS

Day zero is the brief and the deposit that holds the slot. Day one maps the pages and writes the copy. Day two designs and builds the site. Day three adds the search markup and sitemap and takes it live. Sixty days of support follow.
